Synergy Fly

A Word to the Wise...

ADVANCED FLUID LOCK

Advanced funnel design of the top cover locks the fluid and prevents it from flowing back to the surface.

STAIN PROOF

Multiple safety channels combined with dual absorbent core prevent fluid from reaching the sides and bottom for stain free protection.

ADVANCED ABSORPTION

dual absorbent core made of sap and airlaid layer ensure high* absorption. Airlaid layer absorbs fluid and SAP covers fluid gel thus locking fluid at the centre.

SUPER DRY FEEL

Dry Wear top cover along with acquisition and distribution layer (Blue strip) helps quick absorption of fluid & works as barrier between the wetness and skin for a super dry feel.

IRRITATION FREE

High-Quality top cover proven to be irritation free*.

Side wings secure the pad in place and prevent side leakage.

Impermeable bottom layer.
